Foundation Course in

EARLY CHILDHOOD EDUCATION & TECHNOLOGY

info@eduslides.com

1. COURSE DESCRIPTIONS

This course examines the guidelines of Developmentally Appropriate Practice in-depth, with a strong emphasis on play as the foundation of learning. The current trends, history, and future of Early Childhood Education are all explored in this course towards the creation of the intending values.

Through a well-prepared curriculum and theories, educators and guidance will be able to develop their professional philosophy of early childhood education.

Another unique value is that this online course is designed specifically for parents and educators to provide a great insight into early childhood education and development. The skills and knowledge acquired from this course can be practiced in different educational settings which include; home school, daycare, nursery school, preschool, and kindergarten. Some of these settings are privately run, while others are operated by a local school system or under a federally funded program.

Students who undergo this early childhood education course understand that successful early childhood education depends upon partnerships with children's families and communities.

2. COURSE CURRICULUM

Students will understand and realize how families and children vary in their viewpoints and approaches to learning, and they will develop opportunities for learning and growth that are cognitively and culturally good for children ages birth to eight.

1 Early childhood education in brief

2 Child care & health and nutrition - Part 1

3 Child care & health and nutrition - Part 2
